

ONKAR LANKE

Product/UX Designer & usability analyst

+91 86698 82810 · onkarlanke.iitk@gmail.com · [onkar-portfolio-chi.vercel.app](#) · [linkedin.com/in/onkarlanke](#)

— SUMMARY

Product/UX designer and researcher with 5+ years shipping user-centred products across e-commerce, fintech, SaaS, & Retail. Translating messy, ambiguous workflows into products people actually adopt, grounded in primary research, sharpened through iteration, and validated with real users. Recently building AI-native design workflows, prototyping directly with agentic tools to move from insight to testable product faster.

— EDUCATION

M.Des, Product Design , Indian Institute of Technology (IIT) Kanpur, CGPA 9.0	2018 – 2020
B.E., Mechanical Engineering , Sinhgad College of Engineering, Pune University, Distinction (67%)	2013 – 2017

— SKILLS

Research & Strategy: Quantitative and qualitative research, contextual inquiry, usability testing, heuristic evaluation, A/B testing, behavioral & growth analytics, product vision & strategy

Design: Product design, concept generation, prototyping, design systems, visual design, accessibility (WCAG) & inclusive design, 3D art & models, storytelling frameworks, product sketching, wireframing, UI design

Tools & Technical: Figma, Webflow, Framer, Microsoft Clarity, Hotjar, Amplitude, Dovetail, Maze, Typeform, Python (data analysis), Claude / AI & agentic workflows

— PROFESSIONAL EXPERIENCE

Design Consultant - Stealth AI Mar – May 2026

AI-powered tool for architects to execute nano villa and bungalow projects, built to MVP requirements.

- Led primary research, contextual inquiry, on-site observation, and moderated interviews, with practising architects to map their workflow at a granular, task-by-task level, directly shaping feature scope and information architecture
- Identified the critical pain points blocking adoption and translated them into MVP feature and workflow decisions
- Built and iterated a working prototype in Claude Artifacts to test MVP configurations and gather structured user feedback
- Authored training materials enabling AI agents to execute site analysis and 2D-plan / 3D-sectional concept generation

Senior UX Designer - Mindseye Creative Studios Apr 2023 – Dec 2025

- Owned end-to-end UX for multiple client engagements: brief, research, design direction, dev handoff, QA, and delivery
- Led research-driven strategy work that surfaced behavioural insights and reframed client positioning, contributing to measurable growth outcomes
- Directed cross-functional design and engineering teams, resolving design-feasibility conflicts to keep projects on scope and schedule
- Designed and shipped production websites in Webflow and Framer under a new no-code initiative; ran internal workshops on no-code/low-code workflows that cut prototyping time by 50%
- Defined UX research process frameworks adopted studio-wide, improving repeat client engagement by 30%
- Applied behavioural and growth analytics (Microsoft Clarity, Hotjar, Amplitude) to ground client design decisions in usage data
- Mentored junior UI/UX designers on process and craft; contributed to hiring for design and engineering roles

Internal product, DeckUp (SlideXpress): subscription-based AI SaaS companion for consultants

- Co-conceived the product and led product strategy and design end-to-end, research, information architecture, wireframing, prototyping, and design system, for a 4-platform ecosystem (plugin, dashboard, website, installer)
- Led a cross-functional team of 5 (2 visual designers, 3 developers); owned the product roadmap and feature prioritisation through prelaunch

- Ran user testing that refined core toolbar interactions and feature positioning, driving a 40–55% productivity gain for daily users
- Identified a critical engineering capacity gap and drove the hire of a frontend developer whose performance became the benchmark for future engineering hires
- Shipped the MVP and tested onboarding, installation, and product usage directly with early customers

UX Designer, Tata Consultancy Services Ltd.

Sep 2020 – Mar 2023

- Designed end-to-end customer experience for AirAsia across mobile, web, and kiosk touchpoints
- Ran a heuristic evaluation of the Tata Neu app against Nielsen's usability principles, documenting issues and recommending fixes that reduced onboarding drop-off by 7%
- Co-designed a hybrid work-booking platform and a COVID-safety app for proximity tracking and emergency services

— INTERNSHIPS

Product Designer - Kritsnam Technologies

Oct – Dec 2019

- Designed an interactive dashboard for water-sensor data visualisation, device management, calibration, and support, cutting average service time from 47 to 16 minutes (a 65% reduction)
- Designed a custom icon system for faster, clearer visual identification across the interface

UX Researcher - TeamLease

May – Jul 2019

- Led primary and secondary research, on-ground interviews, social listening, diary studies, for a platform revamp, contributing to a 126% increase in post-redesign engagement

— AWARDS & ACTIVITIES

- Impact Leader Award, Mindseye Creative Studios (2023)
- 1st Prize, National Level, UN Secure Himalaya: Snow Leopard Ecosystem Challenge (2019)
- Design Head, Antaragni 2019, IIT Kanpur
- Coursework: Agile Meets Design Thinking, University of Virginia, online (2020)
