ABOUT ME

Senior product designer with 6+ years in building user-centric products & services, backed by critical UX enquiries, product vision & disciplined execution cycles!

Primary, secondary research Ai + Agentic workflows Behavioral & growth Analytics Concept generation Visual Design Python - Data analysis A/B testing Prototyping Accessibility (WCAG) & Inclusive Design Design Systems Product vision, roadmapping

EDUCATION

Indian Institute of Technology, (IIT) Kanpur

Master of Design (M.DES): Product Design (CGPA: 9.0)

2018-2020

Pune University: Sinhgad College of Engineering

B.E. Mechanical Engineering (67% : Distinction)

2013-2017

PROFESSIONAL EXPERIENCE

Product: Design + strategy

March 2026 - May 2026

Laminar Interactive: stealth AI startup - Freelance

- Worked on an **Ai powered tool for architects to execute nano villa and bungalow projects** within hours and initial research and direction for large scale projects. Developed **product vision, user scenarios, critical pain points** and research including surveys & moderated interviews to **shape the features** and workflows. Worked extensively with architects to understand their **workflows at micro level**
- Developed a prototype using Claude, nano banana and Vercel **to test with actual users and gain feedback for phase I model configurations**. Developed **training materials to train model agents** for multiple tasks like site analysis, concept generation in 2D plans and 3D sectional views. The project is stalled due to lack of funding (as of June 25)

Career break: Caregiving

Jan 2026 - March 2026

Product lead: design + strategy

April 2023 - Dec 2025

SlideXpress - A unit of Mindseye Creative

- Co-visioned, conceptualized** & built a subscription based, AI powered SaaS companion for consultants to aid in their workflow, improving 40-55% productivity (time & efforts). Led product strategy & design, including user research, information architecture, wireframing, prototyping, etc. Defined **product roadmap**, prioritized features for **prelaunch**. Conducted **user tests**, synthesizing and refining user interactions and feature positioning. Led **full PDLC**, led **build vs buy** decisions, developer handoffs, backlog and development tracking
- Identified critical gap in dev capacity, recommended and hired frontend developer whose performance became the **benchmark for future engineering hires**. **Flagged critical risk of 3rd party dev dependency** 12+ months before it stalled the product, recommendation was overruled; team was later held hostage for code handover after my exit.

Senior UX Designer

Mindseye Creative

- Managed end-to-end client projects: **Design briefs - Research - Direction - Experience roadmap - Development - Quality control - Delivery**. Led **tech and design teams**, solving critical obstacles between design and technical feasibility.
- Led research-driven strategy across multiple client engagements — consistently identifying behavioral insights that reframed positioning, resulting in measurable growth outcomes including 24% sales lift and ~130% engagement growth.
- Under new initiatives, built **complex websites using no-code tools, Webflow & Framer**. Leveraged Data-informed decision making through **Behavioral Analytics and Growth Analytics** (Microsoft Clarity, Hotjar, Amplitude) for growth

UX Designer

Sept 2020 - March 2023

Tata Consultancy Services Ltd

- Designed **integrated employee experience** systems for **TCS Vision 2025** initiative, creating seamless workflows across workplace touchpoints.
- Conducted comprehensive **heuristic evaluation** of Tata Neu app using Nielsen's usability principles leading to **7% less drops** during onboarding & documented UX issues and recommending design improvements.
- Collaborated end-to-end experience design for hybrid work booking platform & COVID safety app for proximity tracking & emergency services

Instructional Design: (Course Designer) Product Design & Innovation: Freelance

Nov 2022 - Feb 2023

LOM Digital in contract with LearningMate

- Designed the overall structure, scope & sequence for the course, **"Introduction to Manufacturing: Product Design & Innovation"** for students of **9th to 12th class** in the state of **Pennsylvania**.
- The course is an online optional course, which students can choose as part of their studies. Led brainstorming sessions with team members from LearningMate and school teachers. Delivered **sample lessons, and assessments** on the initial front to **facilitate flow, content ideas, and storytelling** for the other authors

INTERNSHIPS

Product Designer

Oct 2019 - Dec 2019

Kritsnam Technologies

- Designed an **interactive Dashboard** for **Kritsnam** water sensors, data visualization, device management, calibration and support services, leading to **65% reduction in service time (47m to 16m)**. Designed custom interactive icons for visual communication rather than text based outputs that helped in faster, easy identification

UX researcher

May 19 - July 19

TeamLease

- Worked for the revamp of the **TeamLease**. Conducted secondary and Primary research for the platform, including on-ground interviews, social listening, diary studies, resulting in engagement growth by whooping **126%** after redesign. Collaborated on the onboarding flows, and the job application flows. Conducted live user testing and provided insights for the Design team.

AWARDS & ACTIVITIES

Impact Leader award: Mindseye Creative

Mar 2023

Agile meets Design Thinking, Virginia University: online coursework on agile and Design & Thinking frameworks

Feb 2020

Design Head: Antaragni 2019, IITK

Jan 2020

UN, Secure Himalaya: Finding solutions for Snow-leopard ecosystem. **1st prize at national level**

Nov 2019
